linkedin.com/in/leonardo-wilis-dev

Frontend Developer focused on building responsive, accessible, and interactive web applications using JavaScript, React, and Next.js. I enjoy turning UI designs into clean, maintainable code while continuously improving my understanding of JavaScript fundamentals and modern frontend architecture.

PROFESSIONAL PROJECTS

Foody — Food Ordering Web App

In progress- github.com/leowilis/foody-app

- Building the core ordering flow: browsing, cart, checkout, and order history.
- Moved search state into Redux after a code review flagged it wasn't following the app's data flow pattern.
- Fixed accessibility gaps (missing alt text) and reduced duplicate logic by extracting shared helper functions.

Library Web App

github.com/leowilis/library-app

- Replaced loose “any” types across the codebase with proper TypeScript generics.
- Built role-based route protection (AdminGuard) so only admins can access admin routes.
- Added delete-review functionality with ownership checks, so users can only delete their own reviews.

Social Web App

github.com/leowilis/social-media-apps

- Migrated data fetching from manual useEffect/useState to TanStack Query.
- Added optimistic updates with rollback for likes and saves using Redux.
- Fixed auth and routing issues that were breaking the Vercel deployment.

Movie Explorer App

github.com/leowilis/Movie-app

- Built a Netflix-style hover popup system with a reusable useCardPopup hook.
- Added skeleton, empty, and error states so the app doesn't feel broken while loading or failing.
- Implemented search, filter (genre, year, rating), and pagination to improve the browsing experience.

EDUCATION

Web Programming Hack (WPH) — Frontend Development Bootcamp

- Intensive program covering React, Next.js, and modern frontend workflows through project-based learning.

ADDITIONAL INFORMATION

Nov 2025 - Juni 2026

- **Languages:** English, Indonesian.
- **Certifications:** Frontend Development (FE).
- **Skills:** HTML, CSS, JavaScript, Tailwind CSS, TypeScript, React, Next.js, Redux Toolkit, TanStack Query, Axios, Git/Github
